PRESS RELEASE

Dear Pool players and fans of the sport,

I am delighted to announce the arrival of a brand new product that could improve your game,

Propockets

This new innovation is simple to use and fits all 9ft pool tables. They come in a stylish folder with doubled sided tape so they are ready to use and easy to store. Just add the ready cut doubled sided tape provided and stick them to the jaws of the pockets to reduce the width of the pocket by up to 10mm but not changing the angle or cut of the pockets.

When you've finished practicing, take them off and place them back into the folder ready for your next time at the table. No damage is done to the table and the balls react the same as if the shims are under the cloth, no more cheating the pockets like you used to, no more playing a ball half way down the rail and going in which means you have to improve your aim and your game.

They are available in 2 colors, tournament blue and your normal pool room green and when you need more of the ready cut double sided tape, that's also available online, so no mess, no cutting and simple to use.

They are available now through the Eurotour webshop page and other outlets such as www.dynamic-billard.com / www.pro9.co.uk and they will be on sale at the Eurotour events, there is also a face book page set up for Propockets. For more details, go to www.eurotouronline.eu and order yours now. A demonstration video will be coming soon on the eurotour website.

I hope you enjoy them.

David Morris
